apps and flows in the inventory	new this month	flows with a new owner	connection stopped by policy

When you receive this document: In the first week of every month, in the ongoing service.

Summary

In October nine apps and flows were added, all in their department's environment. Four flows had no active owner after someone left; the HR department named new owners. The data policy stopped a flow that was meant to copy files to a private cloud storage. Two flows that expense reporting relies on moved to the finance environment after review.

Environments

ENVIRONMENT	PURPOSE	APPS AND FLOWS	IN OCTOBER
Default	Personal workflows of employees	61	7 new flows, all within the policy
Finance	Expenses and payables	27	2 flows moved in from Default
Service	Orders and technician app	31	1 new app after acceptance
HR	Joiners and leavers	14	4 owners reassigned
Test	Acceptance before go-live	10	1 app under review

Open items

- The technician app gets a pipeline from Test to Service in November, so changes only go live after review.
- The department whose flow was stopped now stores the files in its SharePoint site.

Next steps

Next report in the first week of November. Your IT approves new environments and exceptions to the policies.

Every name, system and number in this document is invented. Your report contains your environment on the day of the check.
